11.15.5. Adjudication. A/E may adjudicate any claim in accordance with and to the extent permitted under the Texas Civil Practice and Remedies Code, Chapter 114 or the Texas Government Code, Chapter 2260 only after both parties have completed mediation of the claim in question.

11.15.6. Payment of Claims. In accordance with the Texas Civil Practice and Remedies Code, Section 114.011, TFC may pay a claim resolved under Section 11.14 only from money appropriated to it for payment of contract claims or for payment of the contract that is the subject of the claim. If money previously appropriated for payment of contract claims or payment of the contract is insufficient to pay the claim or settlement, the balance of the claim may be paid only from money appropriated by the legislature for payment of the claim. Chapter 304 of the Texas Finance Code applies to a judgment awarded to a claimant, except that the applicable rate of interest may not exceed the maximum rate allowed by applicable Laws and Regulations. Consistent with the Texas Civil Practice and Remedies Code, Section 114.011, property owned by the State or any unit of state government is not subject to seizure, attachment, garnishment, or any other creditors' remedy to satisfy a judgment on a breach of contract claim.

11.15.7. Representation of TFC. The Office of the Texas Attorney General shall defend TFC in any proceeding or adjudication conducted in conjunction with a claim brought under this Section 11.15.

11.16. Legal Construction and Severability. In the event any one or more of the provisions contained in this Agreement shall for any reason be held to be invalid, illegal, or unenforceable in any respect, such invalidity, illegality, or unenforceability shall not affect any other provision herein, and this Agreement shall be construed as if such invalid, illegal, or unenforceable provision had never been contained herein. Furthermore, in lieu of each such illegal, invalid, or unenforceable provision there shall be substituted a provision as similar in terms to such illegal, invalid, or unenforceable provision as may be possible and be legal, valid, and enforceable.

11.17. Multiple Counterparts. This Agreement may be executed in any number of counterparts, each of which shall be an original, and each such counterpart shall together constitute but one and the same agreement.

11.18. Binding Effect. This Agreement shall be binding upon and shall inure to the benefit of the parties hereto, their representatives, successors and assigns.

11.19. Limitation on Authority and No Other Obligations. A/E shall have no authority to act for or on behalf of TFC or the State of Texas except as expressly provided for in this Agreement; no other authority, power, or use is granted or implied. A/E may not incur any debts, obligations, expenses, or liabilities of any kind on behalf of TFC or the State of Texas.

11.20. Limitation on Adjudication Awards. In the event A/E brings a civil suit against TFC and prosecutes it to final judgment pursuant to Chapter 114 of the Code, any recovery by A/E shall be specifically limited to the balance due and owed by TFC on the Agreement as it may have been amended, including any amounts owed by written change orders. Pre-judgment and post-judgment interest shall be limited to the rate of three percent (3.0%) per annum. A/E HEREBY WAIVES ALL CLAIMS FOR MONETARY DAMAGES FOR ANY AMOUNT THAT MAY BE CLAIMED: (i) FOR THE INCREASED COST TO PERFORM WORK AS A DIRECT RESULT OF OWNER-CAUSED DELAYS OR ACCELERATION; (ii) BASED UPON AN UNJUST ENRICHMENT THEORY; (iii) FOR CONSEQUENTIAL AND EXEMPLARY DAMAGES; and (iv) FOR DAMAGES FOR ANY UNABSORBED HOME OFFICE OVERHEAD.

11.21. No Waiver of Sovereign Immunity. Except as may be expressly and specifically provided otherwise by Chapter 114, Texas Civil Practice and Remedies Code, nothing in this Agreement shall be construed as a waiver of sovereign immunity; nor constitute or be construed as a waiver of any of the privileges, rights, defenses, remedies, or immunities available to the State of Texas, TFC or the Using Agency. The failure to enforce, or any delay in the enforcement, of any privileges, rights, defenses, remedies, or immunities available to the State of Texas under the Agreement or under applicable law shall not constitute a waiver of such privileges, rights, defenses, remedies, or immunities or be considered as a basis for estoppel.

11.22. No Implied Waiver. The failure of a party to insist at any time upon the strict performance of any covenant or agreement or to exercise any option, right, power, or remedy contained in this Agreement shall not be construed as a waiver or a relinquishment thereof for the future.

11.23. No Third-Party Beneficiaries. This Agreement is made solely and specifically among and for the benefit of the parties named herein and the Using Agency, and their respective successors and assigns, and no other Person shall have any right, interest, or claims hereunder or be entitled to any benefits pursuant to or on account of this Agreement as a third-party beneficiary or otherwise.

11.24. Further Assurances. A/E shall take such actions and execute such other and additional documents as are reasonably necessary or desirable in order to carry out the purposes and intent of this Agreement.

11.25. Prohibition on Certain Bids and Contracts. Under Texas Government Code, Section 2155.006, relating to the prohibition of certain bids and contracts, A/E certifies that the individual or business entity named in this Agreement is not ineligible to receive the specified Agreement and acknowledges that this Agreement may be terminated and payment withheld if this certification is inaccurate. A/E represents and warrants that during the five (5) year period preceding the date of this Agreement, A/E has not been: (i) convicted of violating a federal law

in connection with a contract awarded by the federal government for relief, recovery, or reconstruction efforts as a result of Hurricane Rita, as defined by Texas Utilities Code, Section 39.459, Hurricane Katrina, or any other disaster occurring after September 24, 2005; or (ii) assessed a penalty in a federal civil or administrative enforcement action in connection with a contract awarded by the federal government for relief, recovery, or reconstruction efforts as a result of Hurricane Rita, as defined by Texas Utilities Code, Section 39.459, Hurricane Katrina, or any other disaster occurring after September 24, 2005.

11.26. No Presumptions for Ambiguities. Each party hereby represents and warrants that although the initial draft of this Agreement and any exhibits may have been prepared by one party, both parties have been given the opportunity to review this Agreement and those exhibits with counsel of their choice, and have made additions, revisions, and amendments hereto. Therefore, each party hereby covenants and agrees that they are co-drafters of this Agreement and those exhibits such that any ambiguities cannot be construed against any party.

11.27. Time is of the Essence. Time is of the essence with respect to this Agreement; provided however, in the event that any of the deadlines set forth herein end on a Saturday, Sunday, or federal legal holiday, such deadline shall automatically be extended to the next day which is not a Saturday, Sunday, or federal legal holiday.

11.28. Work Made for Hire. All Work shall constitute the exclusive property of TFC. All right, title and interest in and to said Work shall automatically and without further notice or action vest in TFC upon creation and shall be deemed to be a work for hire and made in the course of the services rendered pursuant to this Agreement. To the extent that title to any such Work may not, by operation of law, vest in TFC, or such Work may not be considered a work made for hire, all rights, title and interest therein are hereby irrevocably and unconditionally assigned to TFC. TFC shall also have the right to obtain and to hold in its name any and all patents, copyrights, registrations or such other protection as may be appropriate to the subject matter, and any extensions and renewals thereof. A/E must give TFC and/or the State of Texas, as well as any person designated by TFC and/or the State of Texas, all assistance reasonably necessary to effectuate the intent of this section and to perfect the rights and interests defined herein without any charge or expense to TFC beyond those amounts payable to A/E for the services rendered under this Agreement.

11.29. False Statements; Breach of Representations. By signature to this A/E, A/E makes all the representations, warranties, guarantees, certifications and affirmations included in this Agreement. If A/E signs this Agreement with a false statement or it is subsequently determined that A/E has violated any of the representations, warranties, guarantees, certifications or affirmations included in this Agreement, A/E shall be in default under this Agreement, and TFC may terminate or void this Agreement for cause and pursue other remedies available to TFC under this Agreement and applicable law.

11.30. Abandonment and Default. If A/E defaults on this Agreement, TFC reserves the right to cancel the Agreement without notice and either re-solicit or re-award the Agreement to the next best responsive and responsible respondent. The defaulting A/E will not be considered in the re-solicitation and may not be considered in future solicitations for the same type of work.

11.31. Antitrust and Assignment of Claims. A/E represents and warrants that neither A/E nor any firm, corporation, partnership, or institution represented by A/E, or anyone acting for such firm, corporation or institution has (i) violated the antitrust laws of the State of Texas under Tex. Bus. & Com. Code, Chapter 15, or the federal antitrust laws; or (ii) communicated directly or indirectly the proposal to any competitor or any other person engaged in such line of business during the procurement process for this Agreement. A/E assigns to the State of Texas all of A/E's rights, title, and interest in and to all claims and causes of action A/E may have under the antitrust laws of Texas or the United States for overcharges associated with the Agreement.

SUBJECT: TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project:
Agreement for Engineering and Architectural Services

Dear Billy:

We appreciate this opportunity to present our proposal for engineering and architectural services for the subject project.

As I understand the project, it consists of engineering, architectural, and other consulting services for assessment and design of certain renovations for deferred maintenance MEP, Architectural, and Structural improvements and upgrades at the following buildings:

A. ARC -	Lorenzo de Zavala Archives & Library	1200 Brazos Street
B. CSB -	Central Services Building	1711 San Jacinto Blvd
C. INS -	Insurance Building	1100 San Jacinto Blvd
D. INX -	Insurance Annex Building	221 E 11th Street
E. JER -	James E. Rudder Building	1019 Brazos Street
F. JHR -	John H Reagan Building	105 West 15th Street
G. PDB -	Price Daniel Building	209 West 14th Street
H. REJ -	Robert E Johnson Building	1501 N Congress Ave
I. SCB -	Supreme Court Building	201 W 14th Street
J. SFA -	Stephen F Austin Building	1700 N Congress Ave
K. SHB -	Sam Houston Building	201 East 14th Street
L. TJR -	Thomas Jefferson Rusk Building	200 E 10th Street
M. WBT -	William B Travis Building	1701 N Congress Ave
N. WPC -	William P Clements Building	300 West 15 th Street
O.	Other Capitol Complex Buildings to be identified by TFC at a later date.	

Phases included as a portion of this proposal are: pre-design phase - assessment and conceptual design; design phases - schematic design, design development, and construction documents; bid/negotiation phase; and construction administration phase. While this proposal addresses all phases of work, undefined portions of the design, bid/negotiation, and construction administration phases will adjust based on the results of the assessment.

The combined assessments from TGCE and its consultants will offer general assessments, summary recommendations, and opinions of probable construction costs (OPCCs). From these efforts and the integral collaboration with TFC, the team will make consensus determinations for the design and construction/renovation scope and approach for items not specifically identified in this proposal. These determinations are expected to include prioritization, phasing, and cost considerations which are not evident at this time.

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

To better define the expected engineering and architectural scope, I offer the following outline of Basic Services:

The Deferred Maintenance Project at these 14 project buildings is an atypical project in virtually all respects. The scope set forth herein is therefore intended to supplement, modify, and/or clarify the Basic Services Scope intent for this project, recognizing some elements of these Basic Services are traditionally outside the basic scope of services for a more typical project. It should also be noted that the design effort for many of the scope elements will be significantly disproportionate to the construction costs. Finally, it is expected that the project construction scope (and related design efforts) will strategically adjust to achieve the most construction scope for the available construction funds. Multiple bid packages, design alternates, allowances, unit pricing, and/or other tools will likely be used to accommodate this objective.

Due in part to the special character of this project, there are in some cases reasonable possibilities that conditions will be discovered that merit other services which are currently excluded, not requested, or otherwise not known to be needed. We call these items "unknown unknowns". If such needs arise, the particular condition will be evaluated amongst the project team (TFC and A/E with pertinent consultants, perhaps including the CMR where appropriate) to determine a course of action.

A. General Scope Overview:

General scope of the A/E, common to all disciplines/consultants:

1. Critically review documents and closely coordinate with all team members relevant to individual scopes of a particular discipline/consultant.
2. Include thorough review of and periodic coordination with other affected disciplines/consultants and with CMR for performance, constructability, schedule, and cost, as applicable to the particular endeavor.
3. Maintain work progress and products consistent with the schedule.
4. Provide supplemental information beyond that presented in submission of documents which may be reasonably requested to assist OPCC development by the A/E team and/or the Owner's CMR.
5. Promptly communicate with pertinent parties, including topics regarding information needs and responses to needs of other parties.
6. Actively participate in meetings and/or teleconferences to bring appropriate expertise and recommendations to the project as they may pertain to the overall project or to a specific discipline. Unless indicated otherwise (fewer or greater meetings participation), meetings are envisioned to be up to the following:

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

- a. Assessment phase: monthly for a period of six months
- b. Design and bid phases: monthly for a period of eighteen months
- c. Construction phase: semi-monthly for a period of eighteen months

Project meetings represented above anticipate a completion of construction phase meetings by the end of 2023 Fiscal Year (August 30, 2023).

- 7. During periods when assessment, design, or construction phases occur simultaneously, the above meetings are envisioned to occur in a back-to-back meeting scenario to allow for improved efficiency of the project team. It is envisioned that meetings will be approximately 2-hours per typical meeting, with a total of 10 person-hours (of mid to senior level staff) assigned for each meeting (for preparation, attendance, and minutes/records).
- 8. Prepare meeting agendas and meeting minutes, field reports, and other similar documentation. (Prime consultant is responsible for minutes when prime consultant is in attendance. Where TGCE's sub-consultant is the respective Task Leader, it will be responsible for meeting minutes.)
- 9. Each consultant (prime and sub-consultant) engaged in the respective bid package phases included below will prepare, coordinate (internally and amongst the team), and submit phase/progress documents consistent with the following:
 - a. Combined Concept Design/Schematic Design (as needed for specific scope items, to include a basis of design narrative, drawings, no specifications)
 - b. 50% Construction Documents (CDs - further developed drawings, and full specifications)
 - c. 90% Construction Documents (completed documents excepting minor details being finalized)
 - d. 100% Construction Documents (issued after final coordination/quality control process and Owner's review)
- 10. Provide multiple construction document packages to coordinate with CMR's construction schedule. Design/construction packages are to be determined in coordination with CMR, once under contract. Coordinated packages are intended to allow for multiple construction stages where required to accommodate construction sequencing. Our currently envisioned design/construction scopes currently identified by TFC for possible inclusion in bid packages are as follows, many of which will not be accomplishable inside of the current project budget:

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

- a. Bid Packages: Currently Undefined – Scope of work to be determined based on the results of the supplementary assessments and the confidence of the CMR/TFC regarding the scope elements constructible within future funds that may become available. Future packages scope is not included in the current proposal.

The proposal understands or presumes the following progression of and efficiency of the services (for each design/construction package): a) Schematic Design/Design Development progresses with reasonable convergence so that major plan, scope or design approach changes are not made which significantly impact the design or its related construction cost and design effort; b) Contract Documents progress with reasonable convergence so that plan, scope, or design approach changes are minor only in nature and do not significantly impact the design effort or construction cost; and c) a direction to proceed into the next (sequential) phase of services includes the implicit approval of accompanying floor plans and other designs created to that date (excepting written comments to the contrary).

11. Each consultant engaged for Contract Bidding and Award phase (CBA) and for construction administration (CA) phase shall include the following as pertaining to the discipline:

- a. Critically review submittals.
- b. Unless indicated otherwise, attend construction meetings pertinent to the particular discipline and status of construction, perform critical construction observations, and issue field reports.
- c. Perform substantial completion site reviews for each stage of construction, and issue field reports.
- d. As requested, performing Commissioning Verifications (CxV) and serving as a Commissioning Authority (CxA) have been excluded from the Basic Services scope of services. However, included in our basic scope is coordinating with the CxA for the following: providing review packages; receipt and consideration of comments; coordination of specifications for consistency with the CxA's scope of work; coordination with CMR for delivery of submittals for the CxA's review; and assisting in scheduling the CxA's activities during construction.
- e. Perform final completion site review for each stage of construction, and issue field report.
- f. Prepare record drawings based upon field observations and CMR's as-built drawings mark-up submittals.

B. Summary of Scope Elements

To better define the expected engineering and architectural design scope, I offer the following outline of Basic Services to summarize the elements selected by the TFC project team.

1. Deficiency List Items' Assessments for each building:

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

- a. Assessment for the reconciliation of current Deficiency List I-A, II-A, I-B, & II-B Mechanical items (and those related to Mechanical). Update current Deficiency List with respect to items already completed or remedied in previous design/construction phases. Items indicated as "Maintenance Item" will not be included in the assessment. Assessment phase will include the scanning of existing conditions to establish as-built conditions/drawings, where not available from TFC.
2. Bid Packages: Undefined
 - a. Scope of work to be determined based on the results of the assessments and supplementary assessments and the confidence of the CMR/TFC regarding the scope elements constructible within available funds. Assessment of future packages scope is not currently included in the current proposal.

C. Understandings of Proposal Exclusions:

It is understood that the following items are currently not requested, not applicable, or not expected to be needed by this team. To the extent scope is determined to be otherwise as the project evolves, related scope is subject to additional services.

1. Assessment and Design of systems will be limited to those indicated herein, excluding the following systems' assessments/services: hazardous materials, environmental impact, data, public address systems, furniture/fixtures/equipment, occupant load, energy calculations/modeling, operating concept analysis, life cycle cost analysis, lighting, parking, paving, site drainage, landscaping, site utilities, zoning services, permitting, certification of roof level anchor points, testing/laboratory services, provision of controls/elevator/other technicians required to access assessed systems.
2. Assessment and Design of the following systems will be limited to items that are related to scope of work items included in this proposal (i.e., relocation of fire sprinkler piping and heads to accommodate MEP systems' work), as no specific scope items have been identified: fire alarm, fire sprinkler, interior/exterior finishes, and structure/foundation.
3. Unless specifically indicated otherwise in the scope intents within, it is presumed that existing conditions are suitably functional and code compliant as not to trigger work beyond that described herein. Accordingly, additional function or code improvements to existing conditions are excluded.
4. Coordinating with departments for details or planning regarding disruptions/occupant relocations/etc. related to construction processes is not included in basic scope. (TGCE will coordinate with TFC and respective Building Manager for general provisions and limitations.)
5. All design tasks are based upon existing fixed partitions to remain in place in all subject buildings. Only finishes directly related to project scope are subject to Basic Services architectural/engineering design.
6. Providing opinions of probable construction (or other) costs not directly related to design scopes included in this proposal.

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

7. Opinions of Probable Construction Costs will be performed by TGCE and its subconsultants through design development. All OPCCs after Design Development are to be performed by CMR with review by design team members.
8. Contract Bidding and Award and Construction Administration services for items not directly related to design scopes included in this proposal.
9. Design of additional scope items to meet overall available project construction budget, other than those possibly within the additional design allowance proposed below.
10. Construction phase support services related to extended construction durations beyond those indicated in this proposal (above).
11. Design for corrections to non-compliant life safety or ADA/TAS conditions, (even if advisable or required within the scope of the intended project).
12. Energy modeling, other than simple efficiency comparisons.
13. SECO analysis for alternative energy systems will not be included where modification of energy using systems for individual solicitation packages do not exceed major project size definition by SECO (understood to be \$2,000,000).
14. LEED or other sustainable project systems.
15. Testing, Adjusting, and Balancing (TAB) of HVAC systems, both TAB pre-audit and TAB of installed systems. TAB is understood to be performed by Owner Contracted TAB Firm.
16. Development of ACAD, Revit, or other floor plans/backgrounds of as-built conditions. Our proposal presumes that existing drawings in ACAD or Revit format will be provided to the design team by the Owner and will reasonably represent the built conditions of architectural, structural, mechanical, electrical, and plumbing systems. If our assessment and design phase site visits reveal discrepancies between available drawings and observed conditions, and these discrepancies appear to be potentially significant regarding the assessment scope, we will advise you of same. When additional field measurement or drafting of existing conditions is required to obtain accurate existing conditions, those efforts will be performed under the assessment task to the extent fee is available. If fees beyond those available in the assessment task are required, we can offer a proposal for further examination or evaluation of existing conditions, or otherwise collaborate so that the issues posed by the discrepancies can be addressed.

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

D. Basic Services Fee

As is customary, we have estimated our fees using several methods. We propose the average of these methods, **\$2,400,000 be the Basic Services fee**, including traditional reimbursable items.

The above fee is allocated to each scope item per the below fee schedule. Where TBD is indicated, the fee assigned to the particular scope item will be determined based on the results of the assessment and authorized for use through a reconciliation proposal provide to TFC for their acceptance. Once specific scope fees are established, the fee allocation per scope item will require that all scope items are performed and are done so concurrently to the extent possible. In the event that one or more design scope or assessments are removed from the project, or that reasonable concurrence of the services is not achievable, other scope/building fees will naturally adjust according to the reduced scope and less efficient economy of scale. The intent of this proposal is to reasonably define assessment and design scopes to address all phases of work, although the fees for design, bid/negotiation, and construction administration phases will adjust based on the results of the assessment.

Scope	Assessment/ Concept Fee
<u>Deficiency List I-A/II-A/I-B/II-B Assessment</u>	<u>\$600,000</u>
Sub-Total	\$600,000

The above assessment phase will be billable by effort expended based on hourly personnel costs expended in each billing period, with all unused portions of the assessment fees available for use in the below "Assessments' Future Design Allocation". Assessment efforts will be limited to TFC's available fee budget. Additional assessment items requested by TFC beyond those included in this proposal may also be accomplished inside of this Assessment fee allocation, to the extent that fees are available.

Scope	Design, Bid/Negotiation, C/A Fee
Fee Budget for Below Potential Scope	\$1,800,000
ARC/CSB/INS/INX/JER/JHR/PDB/ REJ/SCB/SFA/SHB/TJR/WBT/WPC	TBD
<u>Assessments' Future Design Allocation</u>	<u>TBD</u>
Sub-Total	\$1,800,000

Following each portion of the respective assessment phase, the above fee budget per task will be revised to reflect the scopes of work authorized to be designed/constructed. The approximate fee breakdown by phase for the above Design is as follows: Schematic Design through Contract Documents - 75%; Bid Negotiation/Construction Administration - 25%.

TFC 20-21 Deferred Maintenance at Capitol Complex Buildings Project: Agreement for Engineering and Architectural Services

The below table represents that Total Fee for the combination of Assessment and Design/CA for this project.

Scope	Fee
Assessments	\$600,000
Design/CA	\$1,800,000
Proposal Fee Total	\$2,400,000

E. Additional Services:

It is sometimes asked that we attempt to identify project elements which may create the need for Additional Services. Other than those related to understandings expressed above, I do not believe the likelihood for Additional Services to be significant. Occasionally, revisions to previously approved work, revisions to previously given instructions, discovery of unexpected conditions, significant delays or "holding patterns" in the conduct of the project, or expansion of scope do present an appropriate case for Additional Services. If such conditions arise, we would advise you of same and seek an equitable compensation for the related work.

Additionally, TFC has routinely requested the assessment, design, and C/A support for additional scope items beyond those currently presented. As such, those additional Owner initiated scope items would be subject to Additional Services.

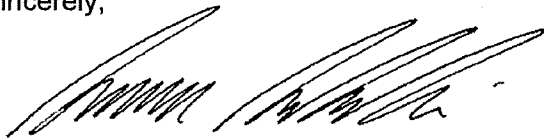

We attempt to extend the benefit of the doubt to others in this respect, recognizing of course that there are business limits to this benefit of the doubt. It is rare that a request for Additional Services from this office is not understood and readily accepted by our clients.

F. Acceptance

If this proposal is acceptable to you, please provide an approval consistent with your normal procedures. Should there be any questions or requested changes, please contact me to go over them at your earliest opportunity.

We appreciate this opportunity to be of continued service to you and the TFC, and look forward to a successful project!

Sincerely,

Cameron Labunski, P.E.

HUB Subcontracting Plan (HSP)

In accordance with Texas Gov't Code §2161.252, the contracting agency has determined that subcontracting opportunities are probable under this contract. Therefore, all respondents, including State of Texas certified Historically Underutilized Businesses (HUBs) must complete and submit this State of Texas HUB Subcontracting Plan (HSP) with their response to the bid requisition (solicitation).

NOTE: Responses that do not include a completed HSP shall be rejected pursuant to Texas Gov't Code §2161.252(b).

The HUB Program promotes equal business opportunities for economically disadvantaged persons to contract with the State of Texas in accordance with the goals specified in the 2009 State of Texas Disparity Study. The statewide HUB goals defined in 34 Texas Administrative Code (TAC) §20.284 are:

- **11.2 percent for heavy construction other than building contracts,**
- **21.1 percent for all building construction, including general contractors and operative builders' contracts,**
- **32.9 percent for all special trade construction contracts,**
- **23.7 percent for professional services contracts,**
- **26.0 percent for all other services contracts, and**
- **21.1 percent for commodities contracts.**

- - Agency Special Instructions/Additional Requirements - -

In accordance with 34 TAC §20.285(d)(1)(D)(iii), a respondent (prime contractor) may demonstrate good faith effort to utilize Texas certified HUBs for its subcontracting opportunities if the total value of the respondent's subcontracts with Texas certified HUBs meets or exceeds the statewide HUB goal or the agency specific HUB goal, whichever is higher. When a respondent uses this method to demonstrate good faith effort, the respondent must identify the HUBs with which it will subcontract. If using existing contracts with Texas certified HUBs to satisfy this requirement, only the aggregate percentage of the contracts expected to be subcontracted to HUBs with which the respondent does not have a continuous contract* in place for more than five (5) years shall qualify for meeting the HUB goal. This limitation is designed to encourage vendor rotation as recommended by the 2009 Texas Disparity Study.

SECTION 2: RESPONDENT'S SUBCONTRACTING INTENTIONS

After dividing the contract work into reasonable lots or portions to the extent consistent with prudent industry practices, and taking into consideration the scope of work to be performed under the proposed contract, including all potential subcontracting opportunities, the respondent must determine what portions of work, **including contracted staffing, goods and services will be subcontracted**. Note: In accordance with 34 TAC §20.282, a "Subcontractor" means a person who contracts with a prime contractor to work, to supply commodities, or to contribute toward completing work for a governmental entity.

a. Check the appropriate box (Yes or No) that identifies your subcontracting intentions:

☒ - **Yes**, I will be subcontracting portions of the contract. (If **Yes**, complete Item b of this SECTION and continue to Item c of this SECTION.)

☐ - **No**, I will not be subcontracting any portion of the contract, and I will be fulfilling the entire contract with my own resources, including employees, goods and services. (If **No**, continue to SECTION 3 and SECTION 4.)

b. List all the portions of work (subcontracting opportunities) you will subcontract. Also, based on the total value of the contract, identify the percentages of the contract you expect to award to Texas certified HUBs, and the percentage of the contract you expect to award to vendors that are not a Texas certified HUB (i.e., Non-HUB).

☒ - **No** (If **No**, continue to Item d, of this SECTION.)

d. Check the appropriate box (Yes or No) that indicates whether the aggregate expected percentage of the contract you will subcontract with Texas certified HUBs with which you do not have a continuous contract* in place with for more than five (5) years, meets or exceeds the HUB goal the contracting agency identified on page 1 in the "Agency Special Instructions/Additional Requirements."

☐ - **Yes** (If **Yes**, continue to SECTION 4 and complete an "HSP Good Faith Effort - Method A (Attachment A)" for each of the subcontracting opportunities you listed.)

☒ - **No** (If **No**, continue to SECTION 4 and complete an "HSP Good Faith Effort - Method B (Attachment B)" for each of the subcontracting opportunities you listed.)

***Continuous Contract:** Any existing written agreement (including any renewals that are exercised) between a prime contractor and a HUB vendor, where the HUB vendor provides the prime contractor with goods or service under the same contract for a specified period of time. The frequency the HUB vendor is utilized or paid during the term of the contract is not relevant to whether the contract is considered continuous. Two or more contracts that run concurrently or overlap one another for different periods of time are considered by CPA to be individual contracts rather than renewals or extensions to the original contract. In such situations the prime contractor and HUB vendor are entering (have entered) into "new" contracts.

SECTION 3: SELF PERFORMING JUSTIFICATION (If you responded "No" to SECTION 2, Item a, you must complete this SECTION and continue to SECTION 4.) If you responded "No" to SECTION 2, Item a, in the space provided below **explain how** your company will perform the entire contract with its own employees, supplies, materials and/or equipment.

SECTION 4: AFFIRMATION

As evidenced by my signature below, I affirm that I am an authorized representative of the respondent listed in SECTION 1, and that the information and supporting documentation submitted with the HSP is true and correct. Respondent understands and agrees that, if awarded any portion of the requisition:

- The respondent will provide notice as soon as practical to all the subcontractors (HUBs and Non-HUBs) of their selection as a subcontractor for the awarded contract. The notice must specify at a minimum the contracting agency's name and its point of contact for the contract, the contract award number, the subcontracting opportunity they (the subcontractor) will perform, the approximate dollar value of the subcontracting opportunity and the expected percentage of the total contract that the subcontracting opportunity represents. A copy of the notice required by this section must also be provided to the contracting agency's point of contact for the contract no later than ten (10) working days after the contract is awarded.
- The respondent must submit monthly compliance reports (Prime Contractor Progress Assessment Report – PAR) to the contracting agency, verifying its compliance with the HSP, including the use of and expenditures made to its subcontractors (HUBs and Non-HUBs). (The PAR is available at <https://www.comptroller.texas.gov/purchasing/docs/hub-forms/ProgressAssessmentReportForm.xls>).
- The respondent must seek approval from the contracting agency prior to making any modifications to its HSP, including the hiring of additional or different subcontractors and the termination of a subcontractor the respondent identified in its HSP. If the HSP is modified without the contracting agency's prior approval, respondent may be subject to any and all enforcement remedies available under the contract or otherwise available by law, up to and including debarment from all state contracting.
- The respondent must, upon request, allow the contracting agency to perform on-site reviews of the company's headquarters and/or work-site where services are being performed and must provide documentation regarding staffing and other resources.

Matthew P. Carlton | Principal & Unit Manager**EXPERIENCE**

Since joining WJE in 1995, Matthew Carlton has served as the project manager for numerous large-scale projects involving construction and design defects, materials failures, structural deterioration, and collapses. His work has included evaluation and repair design for concrete, steel, masonry, and wood structures and a variety of architectural systems. In the course of this work, Mr. Carlton has used nondestructive evaluation techniques as well as structural instrumentation and load testing to evaluate the effects of deterioration on concrete and masonry structures.

In addition to his structural experience, Mr. Carlton has completed assessments, peer reviews, and repair designs for many types of building envelope systems, including stone cladding, brick masonry, precast concrete, stucco, and EIFS, as well as waterproofing for plazas and below-grade applications. He has also had the opportunity to work on several historic projects, gaining experience with load bearing masonry, archaic materials, and historic preservation requirements.

***Continuous Contract:** Any existing written agreement (including any renewals that are exercised) between a prime contractor and a HUB vendor, where the HUB vendor provides the prime contractor with goods or service, to include under the same contract for a specified period of time. The frequency the HUB vendor is utilized or paid during the term of the contract is not relevant to whether the contract is considered continuous. Two or more contracts that run concurrently or overlap one another for different periods of time are considered by CPA to be individual contracts rather than renewals or extensions to the original contract. In such situations the prime contractor and HUB vendor are entering (have entered) into "new" contracts.

Rev. 2/17

HUB Subcontracting Plan (HSP)

In accordance with Texas Gov't Code §2161.252, the contracting agency has determined that subcontracting opportunities are probable under this contract. Therefore, all respondents, including State of Texas certified Historically Underutilized Businesses (HUBs) must complete and submit this State of Texas HUB Subcontracting Plan (HSP) with their response to the bid requisition (solicitation).

NOTE: Responses that do not include a completed HSP shall be rejected pursuant to Texas Gov't Code §2161.252(b).

The HUB Program promotes equal business opportunities for economically disadvantaged persons to contract with the State of Texas in accordance with the goals specified in the 2009 State of Texas Disparity Study. The statewide HUB goals defined in 34 Texas Administrative Code (TAC) §20.284 are:

- **11.2 percent for heavy construction other than building contracts,**
- **21.1 percent for all building construction, including general contractors and operative builders' contracts,**
- **32.9 percent for all special trade construction contracts,**
- **23.7 percent for professional services contracts,**
- **26.0 percent for all other services contracts, and**
- **21.1 percent for commodities contracts.**

-- Agency Special Instructions/Additional Requirements --

In accordance with 34 TAC §20.285(d)(1)(D)(iii), a respondent (prime contractor) may demonstrate good faith effort to utilize Texas certified HUBs for its subcontracting opportunities if the total value of the respondent's subcontracts with Texas certified HUBs meets or exceeds the statewide HUB goal or the agency specific HUB goal, whichever is higher. When a respondent uses this method to demonstrate good faith effort, the respondent must identify the HUBs with which it will subcontract. If using existing contracts with Texas certified HUBs to satisfy this requirement, only the aggregate percentage of the contracts expected to be subcontracted to HUBs with which the respondent does not have a continuous contract in place for more than five (5) years shall qualify for meeting the HUB goal. This limitation is designed to encourage vendor rotation as recommended by the 2009 Texas Disparity Study.*

SECTION 3: SELF PERFORMING JUSTIFICATION (If you responded "No" to SECTION 2, Item a, you must complete this SECTION and continue to SECTION 4.) If you responded "No" to SECTION 2, Item a, in the space provided below explain how your company will perform the entire contract with its own employees, supplies, materials and/or equipment.

SECTION 4: AFFIRMATION

As evidenced by my signature below, I affirm that I am an authorized representative of the respondent listed in SECTION 1, and that the information and supporting documentation submitted with the HSP is true and correct. Respondent understands and agrees that, if awarded any portion of the requisition:

- The respondent will provide notice as soon as practical to all the subcontractors (HUBs and Non-HUBs) of their selection as a subcontractor for the awarded contract. The notice must specify at a minimum the contracting agency's name and its point of contact for the contract, the contract award number, the subcontracting opportunity they (the subcontractor) will perform, the approximate dollar value of the subcontracting opportunity and the expected percentage of the total contract that the subcontracting opportunity represents. A copy of the notice required by this section must also be provided to the contracting agency's point of contact for the contract no later than ten (10) working days after the contract is awarded.
- The respondent must submit monthly compliance reports (Prime Contractor Progress Assessment Report – PAR) to the contracting agency, verifying its compliance with the HSP, including the use of and expenditures made to its subcontractors (HUBs and Non-HUBs). (The PAR is available at <https://www.comptroller.texas.gov/purchasing/docs/hub-forms/ProgressAssessmentReportForm.xls>).
- The respondent must seek approval from the contracting agency prior to making any modifications to its HSP, including the hiring of additional or different subcontractors and the termination of a subcontractor the respondent identified in its HSP. If the HSP is modified without the contracting agency's prior approval, respondent may be subject to any and all enforcement remedies available under the contract or otherwise available by law, up to and including debarment from all state contracting.
- The respondent must, upon request, allow the contracting agency to perform on-site reviews of the company's headquarters and/or work-site where services are being performed and must provide documentation regarding staffing and other resources.

When completing this section you MUST comply with items a, b, c and d, thereby demonstrating your Good Faith Effort of having notified Texas certified HUBs and trade organizations or development centers about the subcontracting opportunity you listed in SECTION B-1. Your notice should include the scope of work, information regarding the location to review plans and specifications, bonding and insurance requirements, required qualifications, and identify a contact person. When sending notice of your subcontracting opportunity, you are encouraged to use the attached HUB Subcontracting Opportunity Notice form, which is also available online at <https://www.comptroller.texas.gov/purchasing/docs/hub-forms/HUBSubcontractingOpportunityNotificationForm.pdf>.

Retain supporting documentation (i.e., certified letter, fax, e-mail) demonstrating evidence of your good faith effort to notify the Texas certified HUBs and trade organizations or development centers. Also, be mindful that a working day is considered a normal business day of a state agency, not including weekends, federal or state holidays, or days the agency is declared closed by its executive officer. The initial day the subcontracting opportunity notice is sent/provided to the HUBs and to the trade organizations or development centers is considered to be "day zero" and does not count as one of the seven (7) working days.

- a. Provide written notification of the subcontracting opportunity you listed in SECTION B-1, to three (3) or more Texas certified HUBs. Unless the contracting agency specified a different time period, you must allow the HUBs at least seven (7) working days to respond to the notice prior to you submitting your bid response to the contracting agency. When searching for Texas certified HUBs and verifying their HUB status, ensure that you use the State of Texas' Centralized Master Bidders List (CMBL) - Historically Underutilized Business (HUB) Directory Search located at <http://mycpa.cpa.state.tx.us/tpasscmbsearch/index.jsp>. HUB status code "A" signifies that the company is a Texas certified HUB.
- b. List the three (3) Texas certified HUBs you notified regarding the subcontracting opportunity you listed in SECTION B-1. Include the company's Texas Vendor Identification (VID) Number, the date you sent notice to that company, and indicate whether it was responsive or non-responsive to your subcontracting opportunity notice.

- c. HUB Subcontracting Opportunity Notification Form

In accordance with Texas Gov't Code, Chapter 2161, each state agency that considers entering into a contract with an expected value of \$100,000 or more shall, before the agency solicits bids, proposals, offers, or other applicable expressions of interest, determine whether subcontracting opportunities are probable under the contract. In addition, at least seven (7) working days prior to submitting its bid response to the contracting agency, the respondent must provide notice of each of its subcontracting opportunities to two (2) or more trade organizations or development centers (in Texas) that serves members of groups (i.e., Asian Pacific American, Black American, Hispanic American, Native American, Woman, Service Disabled Veteran) identified in Texas Administrative Code §20.282(19)(C).

We respectfully request that vendors interested in bidding on the subcontracting opportunity scope of work identified in **Section C, Item 2**, reply no later than the date and time identified in **Section C, Item 1**. Submit your response to the point-of-contact referenced in **Section A**.
